

HORIZONTAL SPLIT CASE PUMPS SCW SERIES

Backed by experience of over six decades standing, state of art prototype facility, manufacturing expertise and of course a passion for quality, CRI pumps have often set the benchmark in providing reliable solutions as evident from its Industrial pump ranges.

SCW Series - Reliability and high Quality, Horizontal single Stage, Between Bearing Pumps for high flow and head, designed as per manufacturer standard to pump water and other liquids with low contamination.

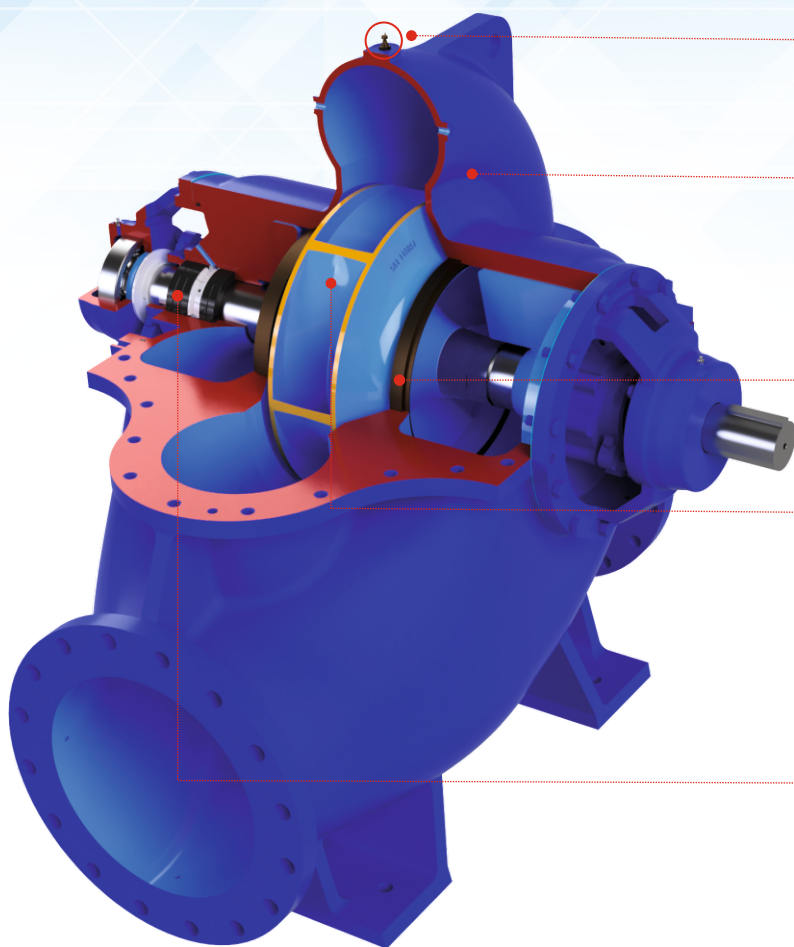

12+ wholly owned subsidiaries spread across all continents with manufacturing / assembly and technical service capabilities, to ensure timely delivery and service.

APPLICATION

- Water supply • Irrigation • Fire protection
- HVAC system • Oil & petrochemical process • Sea water desalination
- Water treatment process • Cooling tower

FEATURES & BENEFITS

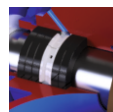

Air release valve -
Facilitate priming.

Top pull out casing design and
Separate bearing housing -
Easy maintenance & Service

Replaceable Wear rings at
both sides of impeller -
Extended product life

Dynamically balanced double suction
Low NPSH impeller - **Efficient and
Vibration free operation**

Common housing for gland
packing / Mechanical seal option -
Easy conversion at site

TECHNICAL SPECIFICATIONS

50Hz

- Module design for maximum interchangeability of rotating units (excluding impeller) - **reducing inventory cost.**
- Options for single and double volute

Flow	:	Upto 5000 m ³ /h
Head	:	Upto 300 m
Power	:	Upto 1500 kW
Outlet size	:	Upto 450 mm
MOC	:	Cl, Bronze, SS, Duplex Super Duplex
